THIS IS UNEVALUATED INFORMATION. SOURCE GRADINGS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1. Three boxcars and two flatcars were seen on a rail siding about one-half minute before the train stopped at Zakarpatskiy Kurorot, a local stop on the line between Svalyava (N 48-33, E 22-59) and Pasika (N 48-32, E 22-54). There were six or seven railroad tracks and the boxcars and flatcars stood three or four tracks away to the right of source's slowly moving train, at a distance of about 40 feet. A trapezoid-shaped object, covered with gray-green rain-repellent canvas, was on each of the flatcars.
2. An army soldier with fixed bayonet was standing on one of the platforms. Source could not tell whether the flatcars had connecting platforms between them. (see sketch 1) The boxcars were of standard size; it was not possible to see what was in them. All cars were probably four-axle. No locomotive was attached to the five cars.
3. On the Svalyava side of the Pasika railroad station building, about 25 yards from source's train, was a lot with a new chain link fence. Three or four new-looking, silver-painted tanks stood in the lot. The tanks were approximately 15 feet long and four feet in diameter and they were smaller than the oil tanks usually observed near railroad tracks. (see sketch 2) The tanks were on supports which were probably steel. On the tops of the tanks there were filler plugs and some tanks had pipes.
